MINING, BUSINESS AND STOCKS.

STOCK MARKET CLOSES WORK FOR THE YEAR

Sales for Year Drop Far Behind That Accomplished for the Year 1909 -Trading for Month Slow.

With the close of trading this morning the trading on the Salt Lake Stock & Mining exchange closed for the year 1910 with a loss of almost 75 per cent as compared with the amount of money that changed hands for stocks during 1999, which was the best year in the history of the board. The official figures issued by the exchange this morning show that for the year 1919, 17,129,-559 shares of stock changed hands and the amount of money paid out for securities was \$4,842,396.63.

Tintic Central and Cedar Talisman were the star performers for the year, more shares of stock in these securities changing hands than any others.

Trading on the board this morning was quiet in view of the holidays. The number of shares of stock that changed hands today was 22,709, for which \$4,843,25 was expended.

Iron Blossom was stronger today and that changed bands for stocks during

States was expended.

Iron Blossom was stronger today and reached 86 cents again. Colorado remained about the same, while Sloux Consolidated was slightly weaker.

On account of New Year's day falling on Sunday this year, the board will celebrate Monday instead. For that reason Caller Wasson of the local exchange declared there will be no session of the exchange on Monday.

There was but little happening on the curb market this morning and only a few shares changed hands. The sales were 200 shares of Gold Chain at 60 cents; 4,000 shares of Uintah Treasure Hill at 8½ cents.

Hill at 8¼ cents. FORENOON QUO'	ration	ıs.

MAY DEVELOP COAL MINË AT MT. PLEASANT

Discovery of Fuel Made Within Three Miles of City Appears to be Large Vein of Bituminous.

According to reports from Mt. Pleas ant, a good vein of coal has been dis covered within three miles of the city, which promises to develop into a large coal mine. On the surface this vein gives promise of being a large, one, but thus far enough work has not been done to fully demonstrate its value. The

vein outcrops in Twin Creek canyon. Bishop William Davis, who has had considerable experience in coal mining, with H. J. Brown, Nielsen Tanner and Andrew Brown are the owners and discoverers of the property. They are preparing to open up the vein and determine fully the prospects of opening up a good coal mine.

The discovery of the vein is some-what interesting. For years persons have been in the vicinity of the vein have been in the vicinity of the vein and have even walked over it. It remained for the flood waters to disclose the coal. The recent freshets tore away the debris to sufficient extent to disclose the coal. It is in the bottom of the canyon, in a place that is almost inaccessible on account of the roughness of the country. The vein thus far exposed is about three feet thick and rests upon a solid bed of rock. As coal is governed more or less by pressure, the heavy pressure on this has made an excellent quality of bituminous coal.

A great deal of prospecting has been

A great deal of prospecting has been done in the vicinity of the vein just discovered. It has long been the belief of one of the residents of Mt. Plensant that there was a good vein of coal in the vicinity. For that reason he caused to be driven a tunnel of considerable length. This tunnel is now within 12 feet of where the vein shows.

CONCENTRATES.

An erroneous idea has sprung up in the cast that the No. 1 shaft of the Iron Blossom has been developed by drills. This is a working shaft and has been developed to the 1,900 level and is kept open for operation to that depth.

The Advocate Mining company, backed by Richfield people is said to be in a very promising condition. Work is being continued and in order to push this during the winter months an assessment of a third of a cent has been levied.

Ame ng the people to be remembered by the large corporations on Christmus day were the Goldfield Consolidated Mines company, some 700 in numberfl Every employe received a turkey. They were all fresh from the ranches in the Carson valley and Bishop county.

Leasers are getting some good ore from the New Empire State Mining company property at Fairview, Nevada, A large ledge carrying gold and silver values, that outcrops, has and silver values, that outcrops, has been cut by a tunnel. The vein is 30 feet wide in the tunnel. Work is now progressing toward the Dromedar Hump ground.

W. J. Shelton has the contract for W. J. Shellon has the contract for the completion of the assessment on the Copper Butte on Deer Creek be-tween the Kimberly and the Marys-vale mining districts. It is the inten-tion of the company to sink a shaft seventy feet deep on the ore vein and considerable other development work is ranned on this property. s planned on this property.

The Utah Apex company declares that it is willing that the Bingham Mary company make a survey of its ground. It is further asserted by one of the stockholders of the company that the Bingham Mary company has been in trouble with the company once before, At that time it is said the Bingham Mary tried to show that the Apex of its veins was on the Bingham Mary ground.

The Silver Shield Mining and Milling company has just made a contract with the United States Smelting, tract with the United States Smelting, Refining and Mining company for the treatment of its lead-zine ores. Since the Tintic Smelter closed the Silver Sheld has had place to ship its ores, As the United States threw open its Huff electrostatic plant—to—custom ores, the Silver Shield is the first to take advantage of it. The silver Shield—ore—will—average—about 12—ounces—silver,—10—per—cent lead and 10 per cent zinc.

TINTIC ORE SHIPMENTS,

The following were the ore shipments out of the Tintic district for the week ending Friday night:

	Ca	
Gold Chain		100

HISTORY AND GEOLOGY OF PIOCHE DISTRICT

Interesting Matter Given in Booklet Issued by Brokerage House-Future Looks Bright

A short interesting history and geological conditions of Pioche in a brief, concise manner are given in a pamphlet issued by the brokerage house of Dern & Thomas on the Eastern Prince Gold & Silver Mining company. In part the

statement says:
When the Indians in Lincoln county When the Indians in Lincoln county, Nev., in the early 50's, led Hamblin, a Mormon missionary, to a rich outerop of ore in Meadow valley, where later the famous old camp of Ploche sprung up, none of them knew that they were lifting the lid to one of the greatest treasure boxes in the world. Hamblin located the first claims. It was not until 1868 that that famous old Frenchman and argonaut, F. L. A. Ploche of California, who salled the Horn in search of treasure with the forty-niners, purchased these claims on the recommendation of his engineer, Charles E. Hoffman, and formed the great Meadow Valley Mining company, the dirst to start mining in the famous camp.

The great bodies of rich chlorides and bromides of silver attracted the world. From 1870 to 1876 the great camp boomed, money was as free as water and things rolled on untained and unand things rolled on untained and unchecked, violent deaths were as common as from natural causes and the district was then 200 miles from a railroad. About Ploche were 10,000 people, a daily paper with Associated Press reports, daily stage lines, fast mulo freight lines with a penaity for not making a certain distance a day, livery stables and 30 hoists putting over shafts. During that period no less than \$20,000,000 were taken out, so the rec-\$20,000,000 were taken out, so the rec ords show, but it was probably much

Then from 1883 to 1893 was the smelter era, under W. S. Godbe and his sons. Mills run and smelters glowed until the panic of 1893 put a quietus on the district. During that period \$10,000,000 more was taken from that great garner house of riches.

* PIOCHE OF TODAY.

A new era was started in Pioche in 1908 with the finishing of the branch of the Salt Lake Route into the camp, Since then thousands of dollars worth of work has been performed and millions of tons of ore blocked out. At no time in the history of the camp has there been as much ore in sight or the dis-trict better understood than it is today. The camp is now on the eve of a great merger, which will again put the dis-trict in the lime-light as a great ship-per, dividend payer and producer, and in a way that has never been known be-

Only the richest of oxidized ore was extracted in the early days, mining and extraction were the crudest. The sulphides of the camp are probably far richer than anything ever taken out and are untouched. There is still a world of oxides left, and it is safe to say that many a million more will be say that many a million more will be taken out in the rich carbonates, bro-mides and chlorides.

During this period the great Prince mine was developed, a mile and a half to the southeast of Pioche.

GEOLOGY OF PIOCHE.

The buried treasure of the Pioche camp was found along a rather low appearing range of mountains which run in a northwest and southeast direction. On the north side of this range is the town of Ploche, nestling up close to the noted old producers of early days. Along each side of this range there is a system of fissuring that makes the big mines. On the Ploche side is the famous Yuba dike, an intrusive porphyry, bearing millions of dollars in sulphides, paralleled by a rich fissure of oxidized ore known as the Raymond and Ely fissure, from which millions were taken. On this side the surface has been croded to the quartzite in high the rich values were

which the rich values were found.
Across the range, a mile and a half southwest of Ploche, is the great Prince mine, in which there has already been blocked out \$8,500,000 worth of ores. Here the lime and shale have not been croded, but stand about 550 feet above the quartzite. Rich, continuous and large bedded ore planes and fissures form in the lime and shale at the Prince mine. The fissures are found to be continuous into the underlying quartzite, and engineers are of the opinion that with depth should be found even greater and richer ore bodfound even greater and richer ore bod-

SIMILAR DISTRIBUTOR.

A similar mineral distributor to the Yuba dike has affected the Prince side of the camp. A glance at a map will show that the Gladstone claim adjoins the Helen claim of the Eastern Prince. Striking northwest and southeast and cutting through the Gladstone claim, is a porphyry dike through which the solutions have undoubtedly come from below and replaced the beds of lime in the shale with a heavy sulphide ore. Later these beds of ore were oxidized by descending waters and wherever a portion of the bed is found that is in an unaltered condition, the ore is of a very high grade, running over 50 per cent lead and 1,000 ounces in silver.

Work on the Eastern Prince is being pushed under the management of Murthe Helen claim of the Eastern Prince

work on the Eastern Prince is being pushed under the management of Murray C. Godbe. The new hoist has been erected at the shaft and no time is being lost in sinking. The management believe that the mineralization of the Eastern Prince side of the like is as great as on the Prince Consolidated side and it is to prove this theory that the shaft is being pushed.

WOOL.

ST. LOUIS.

St. Louis, Dec. 31.—Wool. quiet. Territory and western measures, 21422; fine mediums, 17419; fine, 12413. BOSTON.

Boston. Dec. 20.—The Commercial Bulletin tomorrow will say of the wool market: Heliday dulness has been in evidence this week, but not to the same extent that is frequently the case. A considerable amount of inquiry and sampling on the part of the mills is in evidence and there has not been a dearth of actual business. One sale of staple Montana, involving a half million pounds, has been the chief sale of the week.

The sale was made at 22 cents. Several other lots of 10,000 to 20,000 pounds of original Montana, wyoming and Idaho have also figured in the trading, while there appears to be a tendency to raise prices on fleece wools, which are scarce. The Commercial Bulletin in its annual review of wool tomorrow will call attentions.

prices on fleece wools, which are scarce. The Commercial Bullettin in its annual review of wool tomerrow will call attention to the fact that the stock of wool in Boston is the largest in over 20 years with the exception of 1829.

There remain in Boston at the close of business at the end of the year \$5,569,-600 pounds of domestic and 13,625,000 pounds of foreign woot, against 45,905,-905 pounds of domestic and 7,81,000 pounds of foreign a year ago,

The total stock of all kinds unsold in the United States is 162,521,200 pounds, against 97,322,457 pounds last year. This has been exceeded by Jan. 1, 1901, when it was 233,89,000 pounds; on Jan. 1, 1889, with 176,787,000 pounds. The records of the year show that Boston leads all the world's wool markets except Londen, to which it is a close second. Nearly two-thirds of all the wool in the United States, whether produced here or imported, is now in Eoston warehouses.

PRODUCE.

CHICAGO

CHICAGO.

Chicago, Dec. 31.—Crop damage reports from India lifted wheat prices a little today. Severe cold in the Punjaub was said to have injured the growing grain. There was also gossip that with the Unied States consuming at the present rate the outlook was for a much better militing demand in January and February. The fact that pit offerings were small tended likewise to give the market a buillish tone. The opening was the same as last night to a shade higher. May started at 93 to 93 (297, showing the same variation as the market as a whole, rose to 93 and reacted to 93.

Buyers, though few in the corn pit.

Buyers, though few in the corn pit, were more numerous than sellers and sequence. May opened unchanged to a shade off at 48½ to 48½@§ and advanced

Oats reflected the strength of wheat and corn but had scarcely any other sign of life. May began exactly where it closed, 34634, and rose to 344.

Provisions were hard to get hold of and ascended with hogs. First sales were a shade to 15c. higher with May options at 18.59 for pork; 10.174 to 10.20 for lard, and 9.80 for ribs.

Wheat—Bearish crop figures handed out by the Canadian government led to a slight reaction but were offset by news of discouraging prospects in western Europe especially France. The close was firm with May at 983 @ 97 cents, a net gain of a shade.

\$ \$25. Lard, per 100 lbs.—10.45; May, 10.20. Short Ribs, per 100 lbs.—Jan., 10.325;

BUSINESS IN ALL BRANCHES QUIET

Outlook for Future Contains Very Many Elements of Strength.

HOLIDAY TRADE WAS GOOD

Financial Situation Improved-January Dividends Expected to Help Matters.

New York, Dec. 30.—R. G. Dun & Co,'s Weekly Review of Trade tomor-

Co.'s Weekly Review of Trade tomorrow will say:

After a satisfactory retail holiday trade business in nearly all branches is quiet, with the usual year-end adjustments. The outlook contains many elements of strength. The iron and steel trade is still confronted with a consumption of only half the producing capacity and the dry goods business with the problem of costs, but there is an absence of demoralization, speculation and overstocked shelves in all mercanand overstocked shelves in all mercan-tile lines, while the general feeling of conservative confidence makes condi-tions better than trade statistics indi-

The financial situation is improved and the prospect of the heavy dividend and interest disbursements due Jan. I imparts greater briskness to the strict-

imparts greater briskness to the strictly investment market.

It was a seasonably quiet week in the primary dry goods markets, with values well maintained but still generally close to or below the cost of production.

In cotton goods curtailment of production is generally believed to be inevitable after the turn of the year, when present contracts expire. The firmness in wide gray goods is maintained and there has been a fair business in staple prints for spring delivery, while bleached goods are firm, but with business light.

There is a slightly firmer tone to the market on most kinds of domestic hides. Trade in leather is dull and few sales have been effected outside of odds and ends that are being sold at low prices, although some sales of upper

prices, although some sales of upper leather at very low rates are reported. There is no change to report in foot-wear conditions.

WOOL MEN ROUSED OVER SITUATION

large to give it favorable consideration and due financial support. NUMBER ELEVEN.

Whereas, The present laws of our state and the laws of adjoining states provide that where sheep for a portion of the year graze within the boundaries of said states, that a full year's tax be assessed against said sheep, thereby causing the owner to pay a double tax which is not assessed against any other class of property against any other class of property.

Whereas, In addition to above exorbitant taxation special entrance fees are charged and unnecessary expenses incurred by compulsory dipping of clean sheep entering these states

Therefore, Be it resolved, that our legislators be petitioned to pass such law as will remedy these evils and that our board of sheep commissioners that our board of sheep commissioners be requested to lend their aid in adjusting same. That uniform laws be passed by our neighboring states so that the taxes will be proportionate to the time that the sheep are within the respective states, and that uniform inspection laws and rules be made to provide that where sheep are found clean from disease that same be admitted into these states without extra and special fees.

NUMBER TWELVE.

Whereas, The rules and regulations in the Use book provide for the purchase of permits by new grazers who come under Class "A," providing they are property holders of farm lands or grazing land adjacent to the national forest. We condemn that part of the rules which requires the ownership of these lands, as necessary to acquire the rules which requires the ownership of these lands, as necessary to acquire the purchase right of permits; but would earnestly recommend in lieu thereof that any property holder within the state is justly entitled to purchase permits, believing that distant communities are as much a factor in developing the resources of the state, as those lighter adjacent to the actional forests. living adjacent to the national forests.

NUMBER THIRTEEN. Whereas, the rangers on our national whereas, the rangers on our national forests are men of inexperience, having no practical ideas in handling and grazing of sheep and ignorant of the kind of forage sheep require, being us-ually cattlemen, more or less prejudiced

to our interests.

Therefore, be it resolved, that we recommend that for rangers selected in the future for our national forest be men who are more familiar with the sheep

NUMBER FOURTEEN.

Whereas, that at Portland, Or., the National Woolgrowers' association in-tends to incorporate, and, Whereas, Utah will be entitled to

Whereas, Utah will be entitled to some representation on the board of directors, and.

Whereas, this association holds stock in the National association, and such stock represents the majority of the woolgrowers of Utah.

Therefore, be it resolved, that we recommend that the selection of directors to which Utah is entitled, be left to the Utah State Woolgrowers' association.

NUMBER FIFTEEN.

NUMBER FIFTEEN.

Whereas, we recognize the splendid and efficient work of the officers of this association, and, realizing that it takes money to carry on this important work, and further that every sheepman secures benefits from the association.

Therefore, be it resolved, that we pledge them our united support and urge every flockmaster who has not paid his assessment to do so, and all sheepmen who are not members of the organization to join the Utah state woolgrowers at once.

NUMBER SIXTEEN.

NUMBER SIXTEEN.

Resolved that we heartly endorse

Resolved that we heartly endorse the work done in and out of Congress by Senators Smoot and Sutherland and Congressmen Howell and in their efforts opposing the leasing of public ranges and in maintaining present duty on wool, and we desire to assure them of our keen appreciation of their services.

NUMBER SEVENTEEN. Resolved, that we sincerely commend the services of our chief execu-tive, Governor Spry in his continuing efforts to promote the welfare of the stock growers of Utah.

The Illinois Central has installed a through daily standard sleeping car service between Chicago and San Francisco, via New Orleans.

Eight coal cars are expected any day from the eastern factories by the Consolidated Fuel company.
